

Subject Index

Fall 1983–Summer 1988

In response to numerous requests, last fall we published an annotated index of *Journal* articles published in the previous five years. Because the index was so well received, we've decided to make it a regular feature of the Fall issue. This year's five-year index has been updated to cover articles appearing in Volumes 44 through 48.

Under each subject heading, the articles are listed alphabetically by title. Each title is followed by a code indicating what type of article it is: (F)—Feature; (D)—Dialogue; (H)—How Others Do It; (Q)—Questions and Answers; (P)—Profile.

Copies of the *Journal Subject Index Fall 1983–Sum-*

mer 1988 are available prepaid for \$6.95 each, plus 15% of the total order for shipping and handling (PA, CA, and IL add 6% sales tax).

Copies of any article are available for \$3 each, plus 15% of the order for shipping and handling (PA, CA, and IL add 6% sales tax). All article orders under \$20 must be prepaid. When ordering, please list the title of each article, the author(s), the issue date, and the page numbers.

Make checks payable to the College Placement Council, Inc. Send orders to: Journal of Career Planning & Employment, Reprints, CPC, 62 Highland Ave., Bethlehem, PA 18017.

Career Centers

Adult Learners: Reaching an Untapped Resource (H)

How one college modified its career programs to better serve older students.

Teague, Anne

Winter 1987/22–24

Benchmarks for a Successful Job Fair (H)

Job fairs get the job done, but how do you do it?

Knott, James; Lawlis, Parker; and Maher, Batt

Summer 1987/19–22

Best of Both Worlds, The (F)

How CSU-Long Beach reorganized its career center to combine the advantages of both centralized and decentralized services.

Babbush, H. Edward; Hawley, Wade W.; and Zeran, Jack

Spring 1986/48–53

Bowling Green's 'Increasing Meaningful Student Participation' (F)

Winner of CPC's 1987 Award of Excellence for Program-

ming within an Organization.

Rehrig, Norita H.

Fall 1987/55–57

Building Faculty Support for Career Services (F)

To be effective in providing services, college career offices must have the involvement and support of the faculty.

McGrath, Gary L.

Spring 1984/54–57

Career Counseling Across Cultures (D)

Counselors will be working more and more with foreign students who are of cultures and religions markedly different from their own.

Sommer, Jane

Winter 1987/17–19

Career Development in the Workplace: Academia and Industry Join Hands (H)

How Sinclair Community College designed a career development workshop for employees of a local company.

Haag-Mutter, Priscilla

Spring 1986/20–21

Career Planning and Placement: Views from Different Sides of the Atlantic (F)

After exchanging places, two career professionals discuss the similarities and differences in career development work in the United States and England.

Career Centers (cont.)

Bachhuber, Thomas D., and Pethen, Richard W. Summer 1985/34-38

Career Services and Admissions: An Effective Alliance (H)

Career services and admissions combine forces to recruit students to the University of Arkansas.

Heismeyer, Fred Spring 1986/19-20

Centralized vs. Decentralized Placement: Which Is Best? (D)

A University of Florida survey of employers indicates strong support for centralized career services.

Lewis, Ralph, and Mayberry, Maurice Summer 1985/21-23

College Career Centers: Factories for Failure? (F)

Is your placement program as effective as it could be? A veteran practitioner shares advice on how to avoid misdirecting students and disappointing employers.

Dennis, Donn L. Fall 1985/41-45

College Career Services: Are We Failing? (D)

Career services must become an integral part of the college experience, meeting the needs of administrators, faculty, and students.

Povlosky, Ronald Winter 1985/16-18

Conquering Staff Person Syndrome (F)

By educating the administration, career services personnel can cure the disease that saps their strength on campus.

Wilson, Barbara-Jan Winter 1984/45-47

Creating a Consortium: Big Gains for Small Colleges (D)

A consortium provides a forum for development, interchange, professional extension, and support.

Ash, Karin S. Spring 1985/17-18

Distinctive Competence of Career Services, The (F)

With college budgets tight and getting tighter, career services can survive only by demonstrating its vital role.

Clark, Jeffrey R., and Harriman, Ann Winter 1984/60-63

Do Career Centers Deliver? (F)

According to one study of business schools, students are not getting all the help they need.

Landau, Jacqueline; Somers, Patricia; and Amoss, Lisa M. Summer 1986/49-52

Family Educational Rights and Privacy Act and Prohibiting Disclosure of Credential Files to Third-Party Recruiters (Q)

Is it a violation of FERPA for a school to have a policy prohibiting disclosure of student credential files to employment agencies or other third-party recruiters?

Kaplan, Rochelle K. Winter 1988/23

Family Educational Rights and Privacy Act and the Disclosure of Credential Files to Graduate Schools (Q)

What restriction does FERPA place on disclosing credential files to a graduate school at which a student intends to enroll?

Kaplan, Rochelle K. Winter 1988/23-24

Group Dynamics: How to Work Together for Better Job Fairs (H)

An overview of research on group decision making that can assist career offices working on collaborative activities.

Donahue, Jerry Fall 1986/23-24

How to Create a Winning Ad Campaign for the Career Center (F)

Frustrated with lack of interest, one university developed a marketing plan that greatly increased student participation.

Dorsey, Anne M. Winter 1986/38-42

Integrated Career Planning and Placement: New Lyrics to an Old Tune (D)

A working definition of career planning and placement, and the rationale for implementing it, as developed at Lehigh University.

Seeloff, Eugene R. Fall 1984/16-18

Involving the Campus Community in Liberal Arts Career Services (H)

The College of Wooster developed a comprehensive plan for career services with limited staff and resources.

Case, James G. Winter 1986/23-24

Job Sharing: An Employment Alternative for the Career Services Professional (F)

Using their own arrangement as an example, the authors describe and assess job sharing within career planning and placement.

Johnson, Louise, and Meerdink, Lois A. Winter 1985/29-30

Joint Ventures on Campus (Q)

How career centers can enhance their relationship with corporations by coordinating their efforts with those of development and alumni relations.

Wilson, Barbara-Jan Winter 1987/26-27

Managing the Placement Office by Computer (H)

A new series of software programs is designed to help placement directors face their planning, tracking, and control challenges.

Bruce, Robert C., with Williams, Ric Summer 1987/22-24

More Than Just Another Small Business (F)

A community-based career center opens its doors and takes CPC and the profession into the future.

Yost, Alan E. Winter 1988/37-41

New Internationalism, A (F)

After visiting the United Kingdom and North America, an Australian career director concludes that career services is entering a new era.

Rawling, Steve Spring 1986/36-39

Outreach to Commuter Students (Q)

Some effective strategies for attracting commuter students to career services.

Kahnweiler, Jennifer Fall 1985/27

Paving the Way for The Career Street Journal (H)

The University of Cincinnati developed a career newspaper to publicize career services.

Greenberg, Robert M. Spring 1984/20-23

Placement at the Small College: How Should Staff Time Be Invested? (D)

**SUBJECT/
TITLE/AUTHOR**

**ISSUE DATE/
PAGE NOS.**

Where should time be invested in helping students find their first job—counseling students or contacting employers?

Forney, Deanna S. Fall 1986/19–20

Placement Office Has a Place in Freshman Orientation, The (H)

The placement office takes part in freshman orientation at Indiana Institute of Technology.

Patton, Phyllis Winter 1988/20–21

Profile of Positions Advertised in Career Planning and Placement, A (F)

A study reveals what the job market is like for those who counsel student job seekers.

Carlson, Jan Winter 1985/24–28

Saying "Yes" to Community Career Services (H)

Cal State-Long Beach's Career Development Center offers career services to community residents.

Babbush, H. Edward, and Veady, Deborah Fall 1987/17–19

Swimming Against the Current: Helping Liberal Arts Students at a Technical University (H)

How to give assistance where it is most needed when you have a small staff.

Vulliet, Judith L. Fall 1986/21–23

Telemarketing: A Sound Concept for Career Centers (H)

Telemarketing creates more interviewing opportunities for graduates.

Murray, Neil, and Dorsey, Anne M. Summer 1988/19–22

To Charge or Not to Charge: The Pros and Cons of Fees for Career Services (F)

To help make ends meet, career offices could ask students to pay for services. But should they?

Wendover, Robert Fall 1984/46–50

Using Paraprofessionals in the Career Center: An Award-Winning Model (F)

A report on the 1984 Outstanding Achievement Award for Innovative Programs in the Career Planning/Placement Field.

McKenzie, Ione L. (Onie) Spring 1986/59–61

Where Minorities Meet Role Models: A Special Career Day (H)

For minority students, career days are an effective way to develop an awareness of opportunities in the world of work.

Wortham, Forest B. Winter 1987/21–22

Work-Study Students in the Career Center (F)

From an informal survey come some tips on how to recruit, motivate, and supervise these invaluable helpers.

Wendover, Robert Summer 1987/49–52

Working With Alumni (F)

A survey shows how graduates use—and are used in—career services programs.

Lindquist, Dina A. Summer 1988/37–39

Career Development Theory

Academic Development: The Key to Career Development (F)

The author urges career counselors to place greater emphasis on achievement tests and outreach services in order to survive.

Wayne, George H. Fall 1985/61–64

Company Career Center (Q)

Some practical tips for companies that want to establish a career center.

Gordon, Gil E. Winter 1987/25–26

Not-So-Trivial Pursuit Game, A (F)

Twenty questions to test your career counseling know-how.

Miller, Mark J. Spring 1987/51–53

Six Strategies for Career Counseling (F)

Using Holland's theory of vocational choice, the authors describe a different counseling strategy for each of six distinct personality types.

Rosenberg, Howard G., and Smith, Shayn S. Spring 1985/42–46

Using Interpersonal Influence in Career Counseling (F)

Counselors can use their interactions with students to facilitate career counseling.

Dorn, Fred J. Fall 1984/53–56

Career Information

Career Choices for Music Majors (F)

A dozen answers for the student who asks, "What can I do with a music degree?"

Parker, Gene Winter 1987/57–60

Confronting the Myths About Math (F)

Mathematics multiplies career options, but many students shun the subject because of misconceptions.

Kenschaft, Patricia Clark Summer 1988/41–44

End of an Era in the Allied Health Field, The (D)

There will be no more unrestricted growth in allied health, but there will be new challenges and opportunities.

Myers, Richard L. Fall 1985/17–18

Exploring International Careers (F)

How placement counselors can help students who are considering foreign employment.

Anthony, Rebecca, and Roe, Gerald Fall 1984/24–28

Me and My Shadow: Undergraduates at the Alumni Worksite (H)

Villanova University instituted a formal, ongoing program for information interviewing.

Elliott, Wendy Spring 1985/19–22

Rehabilitation Counseling: A 'Hot' Profession (D)

Rehabilitation counseling is "hot" these days, and the demand for professionally trained counselors is growing.

Thurer, Shari Summer 1986/18–19

What Can You Do With an English Major? (F)

Quite a bit, according to the alumni of one university.

Career Information (cont.)

whose responses to a survey are both surprising and encouraging.

Beidler, Peter G. Summer 1985/46-48

Career Planning

Academic Advising for Liberal Arts (Q)

How career counselors can help academic advisers respond to liberal arts students' questions about employment.

Carr, Patricia Beck Summer 1986/27-28

Academic Development: The Key to Career Development (F)

The author urges career counselors to place greater emphasis on achievement tests and outreach services in order to survive.

Wayne, George H. Fall 1985/61-64

Assessment Center as a Career Planning Tool, The (H)

Baldwin-Wallace College's Appraisal Center has become a key component in promoting student career planning.

Rea, Peter J. Spring 1987/21-22

Career Advising With a Crystal Ball (F)

What career counselors should know about labor market projections.

Somers, Gary M., and Knudson, Mary Jane Fall 1986/40-47

Career Advising in the English Department (F)

A survey of 108 schools looks at the extent to which faculty are involved in this practice—and their attitudes toward it.

Turk, Leonard Summer 1986/58-60

Career Development for Black Students (H)

A career/life planning workshop can be effective in promoting personal growth, vocational planning, and career preparation, particularly with black students.

Piotrowski, Chris, and Keller, John W. Summer 1984/22-25

Career Development Model for College Athletes, A (H)

How the University of Florida put together a career guidance model for student athletes.

Shiflett, Barry O., and Galante, Francine A.M. Summer 1985/27-29

Career Navigation: Another Perspective on Career Planning (F)

"Career planning" implies that students program every step of their lives according to precisely timed promotions, job changes, and raises. But life is not that tidy.

Fisher, Richard B. Summer 1984/26-28

Career Options: Is College Major a Major Factor? (F)

An interview with Dr. Lawrence R. Malnig, author of the best-selling What Can I Do With a Major In . . . ?

Conniff, James C. Fall 1986/48-52

Career Planning and Visually Impaired Students: How It's Being Handled—What Needs to Be Done (F)

The increase in the number of visually impaired stu-

dents enrolled at colleges has brought certain challenges to career planning professionals.

Kirchner, Corinne; Simon, Ziva; and Stern, Henry B. Summer 1985/53-56

Career Planning: A Required Course at Susquehanna (H)

A course to help students find out what they would like to do after college and how to get there.

Cianni, Mary, and Keiser, Pamela Spring 1987/19-21

Coming to Terms with the Career Planning Dilemma (D)

Career planning is caught in a time warp between a quick fix and a slow cure.

Sturman, Skip Fall 1984/15-16

Counseling Athletes (Q)

How counselors can help athletes identify skills that are transferable from athletics to career development.

Mignone, Robert J., and Stoll, James G. Spring 1987/24-25

Counseling Minority Students for Management Careers (D)

Here are some suggestions that may help your office develop a better working rapport with black and Hispanic students.

Airall, Angela M. Fall 1987/15-16

Credit Career Courses (Q)

What is the best way to win administrative support for a credit career course?

North, Richard A. Spring 1986/28-29

Expanding Career Awareness (D)

A Career Awareness Program uses senior advisers to help teach sophomores effective methods for success in their academic and career plans.

Moss, Roy A., and Anthony, Mark Summer 1984/15-17

Freshman Orientation and Career Development: How Effective Is It? (D)

A Bronx Community College orientation and career development course has a positive effect on the academic performance and retention of entering freshmen.

Donnangelo, Frank P. Summer 1985/23-24

How Parents Influence Career Choice (F)

Counselors must recognize students' conflicting needs for guidance and independence from their parents.

Reschke, Wayne, and Knierim, Karen H. Spring 1987/54-60

LAUNCH Program: An Advising Tool, The (F)

A career director describes a series of questionnaires academic advisers can use to prompt students to think about goals, skills, values, and careers.

Roth, Marvin J. Spring 1985/57, 60-61

Life-Work Planning for the Individual in a Changing Work World (F)

This approach shifts the focus from "making a living" to "making a life."

Litt, Benjamin Winter 1984/56-59

Matchmaking: How to Improve Your Success Rate (F)

To better match people and jobs, you must recognize

**SUBJECT/

that not everyone wants to climb to the top of the organization.

Derr, C. Brooklyn

Winter 1988/32-36

Me and My Shadow: Undergraduates at the Alumni Worksite (H)

Villanova University instituted a formal, ongoing program for information interviewing.

Elliott, Wendy

Spring 1985/19-22

Model for Paraprofessionals in Career Planning, A (F)

With undergraduate paraprofessionals, career offices can meet the challenge of budget reductions while answering the demand to expand services.

Kenzler, Bill

Fall 1983/54-61

New Direction for Career Counseling, A (F)

The widespread demand "get me a job" highlights the confusion and disarray among career centers and their clients on the function of counseling.

Figler, Howard E.

Spring 1984/48-52

Not-So-Trivial Pursuit Game, A (F)

Twenty questions to test your career counseling know-how.

Miller, Mark J.

Spring 1987/51-53

Notes From Oxford (F)

A U.S. career director shares the insights he gained last summer at an international placement conference in England.

Weatherall, Robert K.

Summer 1988/32-36

Placement Data and How to Use It (F)

An academic adviser tells how a placement report can help students choose a major that best matches their interests, skills, abilities, and aspirations.

Kishler, Thomas C.

Spring 1985/56,
58-59

Preparing Students Today for Their 'Lifecareers' Tomorrow (D)

Most students are so busy looking for a job career to enter that they fail to consider that life is the big career.

Miller-Tiedeman, Anna

Spring 1988/17-18

Reaching Tomorrow's Scientists Today (H)

Too few women are pursuing scientific and technical careers because they lack encouragement and successful role models.

Parker, Judith E.

Summer 1986/23-25

Role of Black Alumni in Affirmative Action, The (H)

A Washington University alumni network helps prepare minority undergraduates for the transition from classroom to workplace.

Navar, Laurie

Summer 1986/25-26

Senior Orientation: From Here to Maturity (H)

Willamette University developed a program to help students adjust to graduate school or life in the "real world."

Alley, Patricia M.

Fall 1984/21-23

Strengthening 'the Weakest Link' Between Students and Employers (H)

Faculty can be a positive influence in helping students deal with career issues.

McGrath, Gary L.

Summer 1985/25-27

Two Meanings of 'Career', The (F)

In one sense, the word is free of connotation; in another, it is fraught with feeling.

Higher Education

Career Services and Admissions: An Effective Alliance (H)

Career services and admissions combine forces to recruit students to the University of Arkansas.

Heismeyer, Fred

Spring 1986/19-20

College Degrees . . . Still a Ladder to Success? (F)

A review of economic trends answers today's college

Higher Education (cont.)

graduates' most pressing questions about the job market.

Henderson, Cathy, and
Ottinger, Cecilia Spring 1985/35-41

Detroit's Lesson for Higher Education (D)

In hard times, the most successful institutions are those that respond best to the educational needs of their day.

Levine, Arthur Summer 1986/16, 18

Family Educational Rights and Privacy Act and Prohibiting Disclosure of Credential Files to Third-Party Recruiters (Q)

Is it a violation of FERPA for a school to have a policy prohibiting disclosure of student credential files to employment agencies or other third-party recruiters?

Kaplan, Rochelle K. Winter 1988/23

Family Educational Rights and Privacy Act and the Disclosure of Credential Files to Graduate Schools (Q)

What restriction does FERPA place on disclosing credential files to a graduate school at which a student intends to enroll?

Kaplan, Rochelle K. Winter 1988/23-24

Legal Implications of Faculty Referrals (Q)

In referring students to employers, both faculty members and their schools could be liable under federal and state fair employment laws.

Kaplan, Rochelle K. Summer 1988/24

Marketability of Graduates: Why Colleges Should Care, The (D)

The more individuals who acquire positions after graduation, the more students the school will attract.

Koe, Frank T. Winter 1985/15-16

Shape of Things to Come, The (F)

A look at four trends in our society that will bring new form to business and education.

Annisson, Michael H. Fall 1986/61-64

Training Career Services Professionals (F)

The University of South Carolina has developed a formal course to introduce students to principles and practices of career planning and placement.

Campbell, James B., and
Wertz, Sandra L. Winter 1984/65-69

Turning Students Into Centaurs: Trained to Work, Educated to Think (D)

A placement director muses on the difference between training and education.

Munschauer, John L. Spring 1986/24-25

What the Challenger's Crew Teaches Us About Credentials (D)

The Challenger's crew did not need the "right academic labels" to become among our nation's elite.

Patinkin, Mark Spring 1986/23-24

Human Resources

Counselors in HRD: What Do Employers Look for? (D)

Counselor education graduates must successfully

present themselves as having the characteristics valued by HRD employers.

Pitts, James H., and
Shiflett, Barry O. Winter 1986/19-21

How to Evaluate Your College Recruiting Program (F)

Get the numbers you need with this simple system from the author of How to Measure Human Resources Management.

Fitz-enz, Jac Spring 1987/26-30

Interviewing

Career Interview Program—for Liberal Arts Students Seeking Business Careers, A (F)

Working with employers, career centers can offer special placement programs for students who need extra help.

Garis, Jeff W., and
Hess, H. Richard. Winter 1985/39-42

'Equivalent' GPA, The (F)

A formula developed at the University of Arizona 'changes' students' GPAs and helps them get on interview rosters.

Hummel, Ronald L. Spring 1988/51-54

Group Interviews: An Alternative with Advantages (D)

Replacing individual interviews with group screening interviews would allow employers to see more candidates on campus under more favorable conditions.

McCaughy, Ann Fall 1983/17-19

How Job Applicants View Interviewers (F)

A survey of nontraditional students reveals their expectations of and experiences with organizational interviewers.

Latham, Van M.; Callton,
Marla R.; and Muha, Robert G. Fall 1985/57-59

In Search of the Perfect Interview (F)

A survey reveals what students think of recruiters and what they like and dislike about on-campus interviews.

Craig, Betty, and
Greenberg, Robert M. Spring 1986/40-47

Interview Feedback with the SIR (H)

A student interview rating form helps counselors and students evaluate interview performance.

Wolverton, Robert E. Summer 1984/21-22

Interview Sign-Up: When Students Have a Choice (F)

Which interview sign-up method works best? To answer this question, San Jose State sought the opinion of a very important group—students.

Reed, Jerome B. Summer 1984/55-59

Interviewing the Disabled (Q)

How interviewers can make sure the disabled candidate receives a fair interview.

Rumpel, Fritz Summer 1986/28-29

Mock Interview Program with a Bonus, A (H)

Loyola University involved non-placement personnel in their mock interview program.

The Placement Professional as Marketeer

By filling this critical new role, you can acquire a central focus on which to hang your career center's goals and priorities.

BY GARRY R. WALZ

The marketing side of our business is considerably underrated, and placement people who aren't marketing their programs constantly will have a more difficult time than those who are aware of that [the need to market].

—Jack Shingleton

A RECENT EVENING newspaper carried ads from a respected national legal firm offering expert and ostensibly low-cost assistance on a wide spectrum of problems ranging from divorce to personal injury; a dentist offered a "package deal" on orthodontics; a local satellite hospital boasted of 24-hour walk-in medical care; while a plastic surgeon offered reliable and safe redoing of any part of the anatomy that needed to be added to or reduced. A decade ago such ads would not only have been unthinkable professionally but would have been counterproductive to building a clientele. People would have resented them. Today it is commonplace for even august institu-

tions and professions (e.g. Harvard University) to use the tools of modern marketing to enhance their image and attract new customers (a customer is a customer by any name).

Though attitudes in our society toward advertising and marketing have changed remarkably in recent years and even bastions of professional respectability such as the American Bar Association and the American Medical Association are on record as favoring discreet marketing by their members, resistance to marketing by the helping professions persists. Even with a change in professional standards and public acceptance of marketing by members of the helping professions, some career planning and placement center staffs resist the development of an organized marketing program. My experience has been that career center staffs are hesitant to employ marketing principles and practices in their program development strategies for three rather specific reasons. First, they may adjudge marketing to smack of crass commercialism, hardly what a center working to extend its credibility with students, faculty, and alumni would choose to do. Secondly, they may perceive market-

ing as unnecessary—an "if we do our job well, we won't need to market our services; our reputation for quality will spread" argument. A third view is that marketing is O.K. and is probably necessary, but optimistic expectations of what it can accomplish are seldom, if ever, realized in actual practice so it isn't worth a major effort.

I believe it is important at the outset to acknowledge that all of the aforementioned beliefs can be the result of actual experiences that have confirmed for a staff the undesirability of undertaking any major marketing initiatives. "Why do it? We have enough hassles without undertaking anything as expensive and unpredictable as marketing" is a rather typical response. And they are right—based on what they have experienced. There are marketing programs that are in remarkably poor taste; some career centers have achieved high acceptability without conscious marketing; and others have introduced "expert-designed" programs only to have to later swallow their disappointment over miniscule success.

These limited experiences, however, should not blind us to both the desirability and the achievability of

career centers designing and installing effective marketing programs. The benefits far outweigh the negatives. And the consequences of ignoring the marketing imperative can be diminished impact with eventual program stagnation. The difficulties that people experience are not inherent in marketing, but with faulty conceptualization and implementation. Given an appropriate perspective and reasonable amounts of energy, commitment, and skill, a career center can have a useful and self-justifying marketing system.

Notice the absence of any reference to "big bucks." You probably can't spend your way to a good marketing program—although many do try—and you need only modest resources to achieve many of your marketing goals.

Definition of Marketing

How people respond to marketing depends in part on how they define it. The frequent image attached to marketing as the "big sell" can immediately turn off many potential users. Even the usual textbook definitions may come across as inappropriate to a career center devoted more to service than to selling. For purposes of this article, a functional definition of *human services* marketing would read as follows:

Marketing in a human services setting should be targeted to increasing clients' awareness of critical needs and choices and in assisting them to make informed decisions and plans with particular reference to how a given service—e.g. career planning and placement center—can be helpful.

There are two basic tenets behind the above view of marketing. First, we are born into and live and die in a world where marketing is omnipresent. As such, people of all ages develop a mind-set or expectation that a producer of a service will communicate the virtues and advantages of that product or service. If this communication is not forthcoming, it may read as a lack of advantages or, even more unfortunate, a lack of existence. In other words, the public is so used to all manners of services being so extensively and intensively promoted that a service that is not promoted may not even be considered

for adoption or use because of ignorance of its availability.

Contrary to the general impression, marketing cannot make a success of a poor product or service. There are numerous instances of extensively marketed products and services that were either of poor quality or did not fill a real need and that were unsuccessful (e.g. the Ford Edsel). Marketing functions best in situations where it is used to better inform people of the desirability of a superior product or service. It can work well to help distinguish one product or service from an array of other attractive choices, to make it stand out in the user's eyes. As a general rule, it can be said that quality wins out in the marketplace and mar-

keting can assist people to become better informed of the merits of a service.

Basic to what we are saying is that much of what we would describe as marketing is appropriate to career centers and there are basic concepts in marketing that deserve greater attention and interest from career planning and placement specialists. This is especially true as the competition for available resources becomes increasingly intense. The services that best understand and use market forces and strategies are those that will prosper and, in the long term, be the most viable in providing assistance to our society and to individuals. There is a generally shared feeling that career planning and

placement centers don't have all the action they deserve or need. In many ways, this expression of concern over the present state of career planning and placement is a tacit admission that we are not fully in touch with our potential user publics and that we are no longer able to identify clearly what our publics need or want or how to respond to them. There are marketing concepts which will help to identify strategies and procedures that will improve the type and quality of services presently provided, as well as identify new user groups.

Product and Service Life Cycle

Basic to marketing is the concept that every product or service progresses through a predictable life cycle of introduction to abandonment. Regardless of the length of the life cycle, the stages are the same. Some products or services have a very short life (e.g. pet rocks); others become virtual staples in the market (e.g. men's white shirts). The specific stages of this life cycle are as follows:

Stage One: Introduction. In this stage, the product is new and has few competitors. The role of marketing at this point is to build demand by informing potential users of the existence of the product or service and to make them aware of its desirable at-

tributes. This is an exciting period, when the new item can catch people's fancy and quickly snowball in terms of their interests and positive response.

Stage Two: Growth. In the growth stage, there is a shift from building mass demand for the product by showing that it exists to stimulating selective demand. With the entry of competition through the introduction of similar products and services, it is important to stimulate selective demand—i.e., to identify and communicate why a given product or service is best and will most effectively meet a user's need and interest.

Stage Three: Maturity. In this stage, the competition becomes very strong. The sale and/or use of one product or service is usually won at the expense of another as the overall level of sales is stabilized. In this phase, the marketing decisions become more competitive, and it is important to stress the differences between products and services and the ways they may be used or experienced. In particular, it is important to stimulate further response to the product or service by identifying new uses for it.

Stage Four: Decline. In the decline stage, there is a reduction in the use of the product or service. However, the costs remain high, particularly because of the intense competitive effort that is still required. There is also a negative generalization of effect, where the one declining product or service affects others with its undesirability. Frequently in this stage, technology is responsible for introducing new products and the new then drives out the old. The key decision at this point is whether to abandon the product or service, since attempts to retain or redevelop it can be extremely expensive and detrimental to the overall effectiveness of the producing organization.

Challenges in the Service Life Cycle Concept

If we adopt the life cycle concept in our view of products and services, there are two specific challenges to which we should respond. First, it is apparent that each life cycle stage requires a different marketing strategy; i.e., the means of presenting the product or service to the public must be adapted. What will work effec-

tively when first introduced, in the excitement and interest of the earliest identification of the service's potentials, is quite different from what is needed when the service is in either a growth or maturity stage, when there is high competition and it is critical to be able to suggest why a given service is different and better than that of competing services.

Second, there is a strong challenge to find new products or services that will replace those that are in a declining stage and must be redeveloped or dropped. Services that have been allowed to decline for too long a time pose serious problems for redevelopment. Attempting to redevelop a given service or to make it more desirable or attractive may not only be unsuccessful, but may act as a drag upon the viability of other products or services.

These two challenges are, I believe, very relevant to the state of career planning and placement as we know it today. It would appear that in many areas, career planning and placement is in a maturity stage, even approaching a decline. It is not hard to find examples. Employers are taking on the placement function themselves because of their dissatisfaction with the effectiveness of the existing services. Many individuals are forsaking the use of the college placement center to go it alone or by using private career and counseling services. College-level counseling centers in some institutions are in the declining stage of the life cycle because of their presumed attention to too few concerns and too few students. Numerous other examples could be identified. The point is that career counseling and placement services may be in different life cycle stages. What is critical is that we identify the particular stage that each service is in and then develop an appropriate and relevant marketing strategy for it.

The Use of Marketing Concepts in Counseling and the Human Services

As broad social changes take place, we must be able to respond to and reflect those societal demands and needs in our counseling services. We may either do this in an active way, demonstrating our viability and desire to meet people's needs and interests, or continue to resist the life

Garry R. Walz is professor of higher and adult continuing education and director of the ERIC Counseling and Personnel Services Clearinghouse at the University of Michigan. He has written extensively on career development, marketing of human services, human resources development, change agency, and the use of computers in the human services. He is the author of *The Marketing of Counseling*.

Dr. Walz has served as president of the American Association for Counseling and Development and the Association for Counselor Education and Supervision. He does consulting worldwide and recently offered programs and workshops for career development and human resources specialists in the Philippines.

cycles of our products and services, thereby risking abandonment and extinction because of declining usage. I believe that a number of forces are placing the human services in an increasingly competitive and vulnerable position. The stronger and more important ones among them are described below.

1. Self-Help Books. There has been a revolution in the publishing industry with the hard- and soft-cover publications of the self-help variety. These books offer the reader the knowledge and skills to deal with a vast array of life problems (e.g., managing your own finances, writing your own will, conducting your own job search, planning your life career, improving your earning power). They range from systematic and highly organized, self-managed learning modules to brief paperbacks that deal more in euphemisms than in activities. They have won a strong response in the marketplace from people who find professional specialists too expensive or ineffective or both.

2. Self-Help Networks. Allied to, but still distinct from, the publishing revolution is the development of support networks, either highly structured or informal, that help people deal both cognitively and affectively with their problems and concerns. Particularly in the larger population centers, support networks have become a way of life. In many areas of human problems, such as job loss and career transitions, emotional trauma or grief, the support group has become the treatment of choice.

3. Entry of Other Helping Services into Areas Previously Offered by Other Groups. As is true within the commercial marketplace, where a service or product declines with one population and moves on to new areas of potential use, in the helping services field new "helpers" are entering areas once the domain of school and college counselors, and profit-making helping services are moving into fields typically the concern of educational institutions.

4. Availability of Computer and Other Technologically Based Helping Services. The development of computer-assisted career counseling programs, plus a rapidly expanding body of self-help computer software, has provided clients with new options for where and how they receive

help in making career plans and decisions and resolving personal and social problems. Though the more reputable programs stress the need for the supporting services of competent counselors, clearly many adopters see computers and video technology as diminishing, if not eliminating, the need for human counseling interventions. It is likely that the future will see a great increase in the number of self-help and personal growth programs that provide the client with the opportunity for "comparison shopping" before deciding where to obtain help.

These challenges to traditional career counseling and placement services and practices do not include all the competitors. Local conditions will frequently reveal other sources of competition that can be extremely strong and can exert even greater influence on existing career planning and placement services, determining whether they will grow and become stronger or weaken to the point of becoming a tertiary service or even being abandoned.

Marketing Strategies

A useful way to visualize marketing potentialities and strategies is to organize services and users into a 2 by 2 matrix (Figure 1). The first cell, *Old Services, Old Users*, is the traditional approach. It says, in effect, "stay with what you know best, do what you have been successful doing in the past." This approach implies a long life cycle and, since it involves

doing nothing new, is in one sense the safest. From another perspective, it can be dangerous by lulling providers into "business as usual" as the formula for success. However, along the product life cycle, there does come a time when a change must be made (e.g., Volkswagon Beetle and previous stability may both obscure the need for change and make it difficult).

The second cell, *New Services, Old Users*, is the next safest approach. The risk in bringing out new services is minimized because of the knowledge of the users. If you know who your users are, you are able to couch and present new services in ways that are responsive to the needs and interests of your users. Since you know them and they know you, the confidence and trust built up over previous years eases the transition to adopting and using a new service.

The third cell, *Old Services, New Users*, is a difficult area because you lack experience in dealing with the users, hence are not aware of their characteristics, needs, and interests. Your communications to them may go awry because you emphasize the product or service rather than focus on how it can be helpful and useful to them.

The fourth cell, *New Services, New Users*, is the most difficult area of all because you lack knowledge of the users' experience and the product. This "double whammy" helps to explain why so many new products are so unsuccessful and short-lived. The

FIGURE 1

Matrix of Services and Users

Old Services, Old Users (1)	New Services, Old Users (2)
Old Services, New Users (3)	New Services, New Users (4)

total unfamiliarity with both variables may lead to major "goofs" that familiarity with either the product or the users would have prevented.

Relevant Marketing Concepts

In seeking to apply marketing concepts to counseling, it may be helpful to select the major ideas that offer the most promise for strengthening counseling in the human services.

1. The single most important factor contributing to new product or service success is product/service *uniqueness* and *superiority*. The competition for services now offered by career centers demands a response from them that identifies how their service is unique and why it is superior to the others. Generally, in counseling, we have ignored the factors of uniqueness and superiority. Is it because we feel we do *not* have a unique service, or that we *are* superior in the way we respond compared with other providers? I think the answer is that we do need to respond clearly if we are going to deal more adequately with our current product cycle and the competition we have been experiencing.

2. It is crucial in a marketing approach to know your audience and potential consumers and their needs. Generalized assumptions or impressions are an inadequate basis on which to make important marketing decisions. It is important, therefore, that a regular program be undertaken to assess the nature of our publics and their interests and needs. Major marketing groups are now stressing the importance of "we-ism" and family values over individualism, a response to our aging population.

3. Product myopia occurs when an organization focuses on the product or service rather than on the needs that the product or service addresses. This concept is akin to organizations or professionals who continue to do what it is they do well, rather than what it is the public needs or wants. Perhaps the best illustration of this from the counseling field is the continual high priority that helping professionals give to individual or personal counseling, while the public, whether students, adults, or other clients, consistently gives this a low priority. Perhaps more than most factors, product myopia leads to the decline of an organization because of

the continual inward focus, rather than an outward focus that will lead the organization to identify systematically the new needs and interests of its potential users and consumers.

The introduction of new products and services is a crucial responsibility of all organizations, but this process is likely to be costly and difficult. It has been suggested that a successful new product or service will result from every seven ideas, and it is predictable that the majority of new ideas will be unsuccessful. Hence, an organization must be prepared to experiment and try out new ideas and practices and expect that the majority of them will fail.

4. The success of organizations in developing new products and services appears to be a function not of the amount of money put into research and development, but rather of managerial skills and expertise in marketing programs and services. Another way of saying this is that throwing dollars at problems or areas of need is not a "sure-fire" way to be successful. The common answer to why a counseling program is not working is that more money, resources, and staff are needed, but the answer may really be that the program needs to be better managed, with a clear delineation of the real needs and interests of the publics who are being served.

5. It is important from a marketing standpoint that we use the service life cycle in anticipating and planning for both problems and opportunities. Those organizations that have been the most successful over long periods have done so by continuing to upgrade their product offerings to meet new and changing needs. It is absolutely crucial to career planning and placement that we continue to look at changes in our population subgroups that indicate different needs and interests, and to make appropriate changes in how we present, prescribe, and provide counseling. To continue services in the same manner as in the 1960s and 1970s is tantamount to resigning ourselves to a decline in the vitality of career planning and placement as a social helping force.

6. Synergistic interface is a concept of combining a stable product or service with new information or a high technology change. This inter-

face extends the life of the stable product and increases the growth of the new change. A clear example of this is the application of computer-assisted career guidance to career guidance services. Adding technology to career counseling extends the use of career counseling and probably also increases interest and use by new and different groups.

7. A successful marketing plan is geared to developing new markets and new users. This is accomplished particularly by creating new uses: new uses of an existing service, new users of an existing service, and new occasions or reasons for using the service. This emphasis on the new use of the service has many advantages over a new service, in that development and marketing costs are considerably less and the expansion of counseling beyond the crisis or problem orientation is an excellent general approach.

A Marketing List for Counselors

There are countless actions that counselors can adopt to improve the marketing of counseling and human services. A number of these possible actions have the potential to increase significantly public knowledge about and use of career planning and placement services. However, implicit in the marketing approach is the pivotal concern for targeting effort and resources. It is not how much you do, but how well targeted your efforts are and how effective you are in delivering on your "targets of opportunity." What follow are six specific recommendations and actions that are likely to enhance considerably the image that potential publics have of career planning and placement services and increase their use of them.

1. **Adopt a positive attitude toward the use of marketing concepts and strategies in more effectively disseminating career planning and placement services.** Shorn of their advertising gloss or crass public relations image, marketing concepts are remarkably similar to many of the main-line concepts and principles of human services. Marketing basically is built upon the concept that the product or service that best reflects the needs and interests of potential consumers and responds to them with the high-

est order of superiority and quality is likely to be the most successful. That is a very compelling concept, one that has great potential utility for counseling. It is absolutely crucial, therefore, that counselors and career planning and placement specialists understand that by using marketing concepts they are working to understand their potential clients better and to assist them with making more informed decisions and plans.

2. Define what excellence and quality are in career counseling and placement services. The need here is double-edged. First, counselors need to inform themselves in the clearest possible terms as to what excellence and quality are. Without clear definitions of excellence, they will be unable to judge for themselves and to evaluate the effectiveness and success of their individual programmatic efforts. Second, counselors must be able to communicate what quality and excellence are in terms that are understandable to consumers and users so that they may be able to use this information in making decisions to select the best from among the available services.

3. Develop an appropriate marketing strategy for each stage of development. The decision as to the appropriate marketing strategy to adopt should be guided by the level or stage of development that a given product or service is at. We should not devote all of our efforts to dealing with old products and old users, or to new products and new users. Either strategy would be harmful over a period of time. Rather, we need to identify the level of development of each of the products or services that we have prioritized and develop a strategy that is appropriate given the level of its development. An intermix of strategies with products and services at different stages of development is likely to bring the most positive consumer and user response and also to provide a strong undergirding for program renewal. This will also serve to negate the omnipresent effects of obsolescence. Simply stated, it is a way of avoiding putting all our eggs in one basket in an area where it is extremely difficult to predict what products or services will be needed next.

4. Make a strong and ongoing commitment to the research and

development of new programs and practices. Perhaps one reason there has been such steadfast adherence to traditional modes of delivery of counseling and the human services has been the lack of viable alternatives. For example, being unsure of what options, if any, they have, some counselors have engaged in pitched battles to preserve what they know best, individual counseling. It would seem essential to any organized program effort that part of the time and resources of that unit be devoted to experimental approaches to dealing with client and potential client needs and interests. The greater use of group procedures, the infusion of technologies, expanding outreach services such as networking, and the linkage with self-help programs are just a few of the potential avenues of renewal and development that offer promise for counselors.

5. Maximize the building of synergistic interfaces. The aforementioned sources of competition for counseling services, while clearly a threat or challenge to traditional counseling, may at the same time provide bridges that can be used by innovative programs to increase their synergistic interfaces. By linking and collaborating with other individuals and groups and incorporating new concepts, approaches, and resources into their offerings, counselors can greatly increase the overall power and impact of their interventions with both individuals and groups. These efforts, while perceived by some as dispersing professional contact, are in fact more likely to increase the potency of the counselor's ability to work with and be of assistance to large numbers of clients with different needs and interests.

6. Regularly and systematically assess user and potential user needs and interests. It is easy for human services personnel to become convinced that they are aware of and know all they need to know about the needs and interests of the clients they serve. They become experts in their own minds on what they should do, in what ways, and with what emphasis. Such an approach denies the difficulties inherent in making judgments about the needs and interests of any consumer or client group—judgments that require systematic assessment and pro-

grams and services based on the responses to that assessment. Programs that rely on unsystematic observations of their own specialists run the strong risk of focusing inward rather than outward, and of doing what the specialists desire to do rather than what their clients and consumers need. Almost as important, the systematic assessment of user needs and interests becomes a vital source of information to share with funders and decision makers to document and validate that the program is clearly responsive to the needs of the populace which it serves.

Acquiring a Central Focus

In this article, I have spoken of the need for the career planning and placement specialist to become a marketer—versed in and committed to the use of marketing concepts and tools to improve the quality and extend the use by clients of career planning and placement programs and services. Rather than present a model program or a laundry list of steps to adopt, I have presented ideas that I believe can be adopted and adapted by a center to develop its own customized program. The ideas presented are illustrative rather than exhaustive and are neither as comprehensive or as fully developed as those I have used with many programs. But I believe that those ideas can suffice to excite and motivate career planning and placement centers to expand and enhance their marketing initiatives. More than anything else, I believe that by adopting a marketer orientation to their program, career planning and placement specialists acquire a central focus on which they can hang their goals and priorities. Such an orientation not only focuses the activities of different specialists, but also insures that undergirding their separate efforts are two central themes—providing quality in all services and maximizing the number of persons to whom those services are offered.

Tough Choices: Ethical Dilemmas in Our Profession

In this first in a two-part series, placement directors reveal how they would handle issues of conscience on the job.

BY RICHARD FEIN

MUCH OF WHAT WE do in the college placement and recruitment profession is challenging, difficult, or perplexing. One such area that has gained increased attention recently is the concern for ethics. Ethics may be defined as a "quest for the good, the right." A major problem, of course, is determining what the "good" is in a given situa-

tion. This problem becomes a dilemma when *two* apparent goods come into conflict.

To examine how people in the placement and recruitment profession would react to a variety of ethical dilemmas, questionnaires were sent to 300 college placement professionals and 300 corporate college relations professionals selected at random from the membership list of the College Placement Council. There were 150 responses from the placement professionals and 87 from the college relations professionals.

Separate questionnaires were designed for the two groups. In both cases, respondents were asked what they believed was the proper thing to do in different situations involving ethics, described in brief scenarios. They could respond from a variety of pre-stated answers or compose answers of their own. Several scenarios probed the penalty one would be willing to risk pursuant to an ethical belief, with the goal of examining the *strength* of the conviction in addition to its substance.

In Part One of this article, I will report on the views expressed by the placement professionals, whom I'll call "directors," and some of the

implications. (Part Two, covering the college relations professionals' views, will be published in the next issue of the *Journal*.) My approach was descriptive rather than prescriptive, and I do not presume to judge any response as more ethical than another. In some cases, I've pointed out issues that might be explored further. Finally, the complete scenarios and responses presented in the placement directors' questionnaire appear in Figure 1. Statements in quotation marks are taken from this questionnaire.

Conflict Between Students

When the interests of two students conflict, how should the placement director respond? In the first scenario presented, the director must decide whether to operate outside general procedure in order to provide an interview opportunity to a student (Louis) who has few job possibilities. The alternative is to follow procedure and act neutrally between the two students, knowing that the other student (John) "will never accept employment" with the firm in question.

The dilemma positions John's right to an interview against Louis' chance for a job. Any benefit to one (e.g.

Funding for the research underlying this article came from a grant provided to the School of Management, University of Massachusetts, Amherst, by May Company Department Stores.
